8. Concerns brought up at last SCC meeting about aggressive behaviors in the classroom specifically students being targeted by aggressive students. A Behavior Steering Committee was created in late October. Changes were put in place January 4th. Students were moved out of certain classrooms and into other classrooms. The goals being to even out the classes sizes and move non-aggressive students into classrooms of other non-aggressive students. In the more aggressive classrooms there has been a massive reduction in the number of aggressions due to the smaller class sizes.
